PROJECTS

Outrun Chase August 2020 – Present
Started as a project for Hackathon HAB-59, continued under SDSLabs [View Project](#)

- Outrun Chase is a retro-wave outrun themed racing/shooting game with support for both Internet and LAN multiplayer developed in Godot engine.
- Implemented major gameplay mechanics, optimized the game for mobile devices and added support for dedicated server based multiplayer.

E-ID card Admin Portal February 2021 – March 2021
Developed as a member of SDSLabs for IIT Roorkee

- ReactJS based admin portal used for issuing ID-Cards and solving student queries using libraries like Redux, Axios and AG-Grid.
- Implemented majority of the front-end and integrated it with the back-end.

Attendo September 2020 – November 2020
Dept. of CSE, IIT Roorkee (for course CS-291: Object Oriented Analysis and Design) [View Project](#)

- Attendo is a WiFi based attendance marking mobile application.
- Implemented screens and networking related tasks.
- Tech Stack: Flutter, Firebase, Bonsoir (Network Service Discovery), Socket Programming

Rootex September 2020 – November 2020
SDSLabs [View Project](#)

- Rootex is a 3D game engine written in C++.
- Implemented the camera component that made it possible to add multiple cameras in a level and made camera movement possible.
